

**WHAT IS CLAIMED IS:**

1. A step system comprising:  
connecting material; and  
a plurality of steps attached to the connecting material, said steps being  
spaced apart by a distance sufficient to allow an adult to kneel between  
neighboring steps.
2. The step system of Claim 1, wherein the steps are spaced apart by  
approximately 20 inches to approximately 36 inches.
3. The step system of Claim 1, wherein the connecting material is  
approximately 10 inches to approximately 36 inches wide.
4. The step system of Claim 1, wherein the connecting material is nylon  
6000 pound seat belt webbing.
5. The step system of Claim 4, wherein the nylon is approximately 900 to  
approximately 1,000 denier.
6. The step system of Claim 1, wherein the connecting material is a closed  
material.
7. The step system of Claim 1, wherein the steps are attached to the  
connecting material by 6000 pound seat belt webbing.
8. The step system of Claim 1, wherein the step includes a handle.
9. The step system of Claim 1, further comprising a life line attachable to  
the handle.
10. The step system of Claim 1, wherein the step is comprised of high  
impact plastic.

11. A step system comprising:  
connecting material; and  
a plurality of steps attached to the connecting material, said steps being  
variably spaceable.

5           12. The step system of Claim 11, wherein the steps may be spaced out of  
parallel.

13. The step system of Claim 11, wherein the step further comprises a non-  
skid surface.

14. The step system of Claim 11, wherein the step further comprises a  
10 keyhole-shaped sleeve for passage of a fastener.

15. The step system of Claim 11, wherein the step further comprises ruler  
demarcations along one edge.
